

## Wall Mount Design: The Simple Beauty of an Open Space

- Exclusive wall mount design offers a cleaner appearance, freeing the garage ceiling of hanging operator, rails, chains or belts—and opening up additional storage and space.
- Perfect for a home with a room above the garage—this ultra-quiet wall mount eliminates direct transfer of sound and vibration through the ceiling.
- Design allows for installation in garages with cathedral or obstructed ceilings.
- The Remote Light lets you light your garage your way, wherever it's needed. (Additional Remote Lights available, model 380LM.)
- The Power Lock deadbolt ensures the door can't be forced open.

## Simple Control from Anywhere

With MyQ® technology, you can stay connected to your home wherever you go via your smartphone, tablet or computer. MyQ enables you to manage, monitor and control everything from lights to garage door openers and beyond—anytime, and from anywhere.

Our exclusive Security+ 2.0™ technology, found in the LiftMaster® garage door opener remote controls, provides extra peace of mind for you and your family. This rolling code technology assures a new code with every use, making it virtually impossible for anyone to steal your remote control signal.

Designed for how you live, LiftMaster® technology puts you in control.

## Accessories Included:

### MyQ Control Panel (888LM)

- Compatible with other MyQ accessories providing freedom and control.
- The Timer-to-Close feature automatically closes the garage door after 1, 5 or 10 minutes.
- The Motion Detecting feature turns opener lights on automatically when you enter the garage, then turns them off.
- Enables easy programming for Remote Controls, Keyless Entry and MyQ accessories.

### 3-Button Elite® MAX Remote Control (895MAX)

- Controls up to three garage door openers, commercial door operators or MyQ enabled light accessories.
- Compatible with all LiftMaster® garage door openers manufactured since 1993.
- Multi-frequency Security+ 2.0™ virtually eliminates interference.
- Sleek design includes backlit buttons for night operation.

### Remote Light (380LM)

- Allows placement anywhere in the garage so you can light your space the way you want. Uses (2) 100W bulbs (not included).

### At LiftMaster®, safety is a major part of our mission.

It's our commitment to you and, quite simply, the way we produce products every day. Our LiftMaster® products are designed to move the largest door in your home, safely, securely and by always putting safety first.

## WALL MOUNT GARAGE DOOR OPENER

### Unmatched Communication, Safety & Security

LiftMaster® is making your home safer and more responsive to how you live.

- **Auto force and electronic limits** mean the garage door opener adapts to weather and changing environmental conditions.
- **The Protector System®** safety sensors project an invisible light beam across the garage door opening and automatically reverse the door if anything interrupts the beam while the door is going down. Garage door opener lights turn on automatically when The Protector System infrared beam is broken.
- **Alert-2-Close** warning system provides UL325-compliant audible and visual warnings that the garage door is about to close when using the Timer-to-Close, or remote closing features. (Timer-to-Close is for sectional doors only, not one-piece doors.)
- **Battery Backup Capable** enables the user to get in the garage every time, even when the power is out. (Requires a separate battery, model 475LM.)

### LiftMaster® MyQ Enabled Accessories: The Freedom to Enjoy Your Life

The 8500 is manufactured with MyQ technology, which enables you to tap into even more features for maximum confidence, communication and compatibility.

#### LiftMaster® Internet Gateway (Model 828LM)

Uses MyQ technology to connect to and control your garage door opener or gate operator from anywhere via a smartphone, tablet or computer.

#### Garage and Gate Monitor (Model 829LM)

Uses MyQ technology to monitor and close your garage door or gate from any room in the house.

#### Remote Light Control (Model 825LM)

Operate any lamp with your garage door opener remote control or from your smartphone, tablet or computer via the LiftMaster® Internet Gateway.

#### Remote Light Switch (Model 823LM)

Control lights remotely through the LiftMaster® Internet Gateway or select remote controls.

### Convenience on the go!

#### MAX Wireless Keyless Entry (Model 877MAX)

Features Security+ 2.0™ technology to open or close your garage door with a secure, private 4-digit code. Program temporary access codes for visitors or delivery and service personnel. Works with LiftMaster® garage door openers manufactured since January 1993. Plus, one-button-to-close feature allows you to close the garage door without having to enter the code, and works with all LiftMaster® garage door openers manufactured since 2006.

#### Wireless Control Panel (Model 885LM)

Easy to install with no unsightly wires to run across the garage. Adds convenience by allowing door control at multiple locations, wherever needed.

#### Battery Backup (Model 475LM)

Optional Battery Backup accessory enables the user to get in the garage every time, even when the power is out.
